Problem

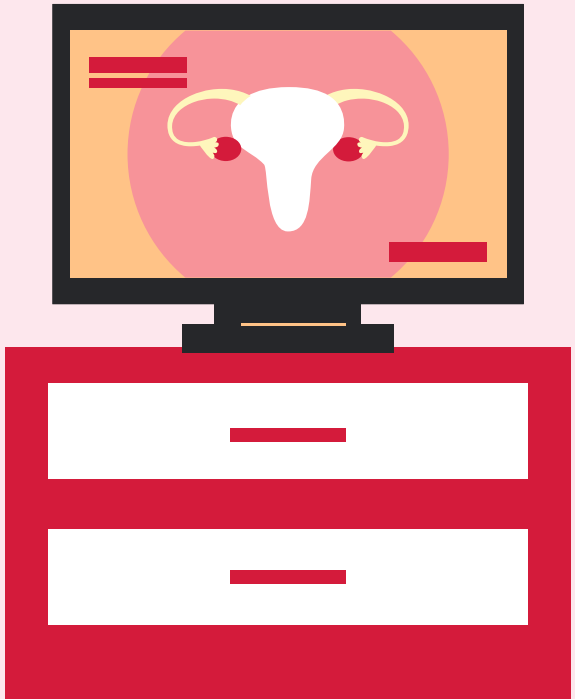

Women’s Health – A Global Crisis!

- Women’s Health is the diagnosis and treatment of physical, mental and emotional conditions suffered by a woman.
- How serious is it ?
  - **48.1% women** aged 15-49 in the United States **use contraceptives** [3]
  - **There are 6 million unplanned American pregnancies per year** – imagine how many on a global scale [2]

Women’s Health – A Global Crisis!

Taxpayers spend **$12 billion annually** on unintentional pregnancies [13]

What is Birth Control?

The practice of **preventing unwanted pregnancies,** especially by use of **contraception.**

Customer Discovery

Access

- **Uptake** of birth control implants in rural, low-income areas
- Lack of **Trained Providers**
- Education

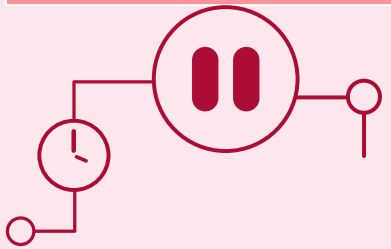

Awareness

- Misconceptions
- 30-45 minutes spent convincing patients
- “Fighting social media myths”
- Cultural /social norms and beliefs

Comfort

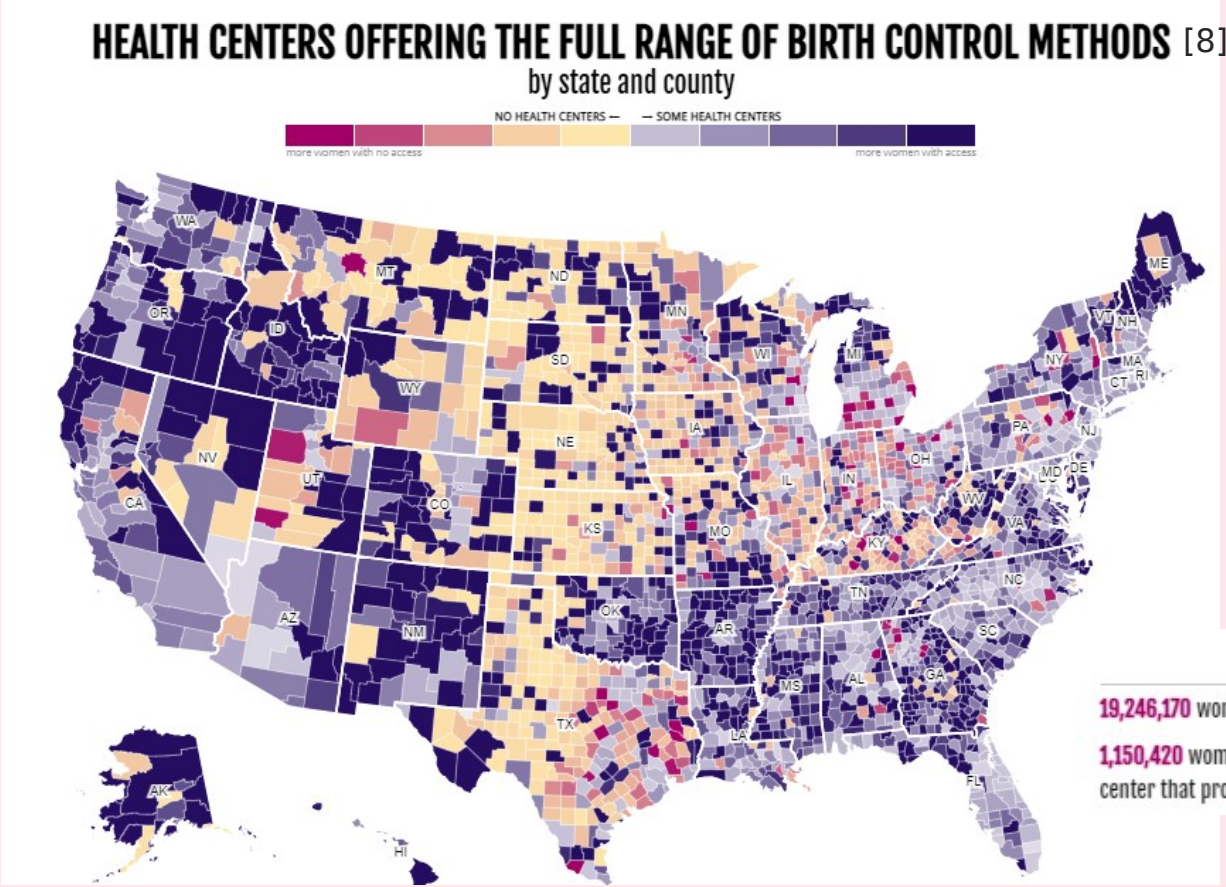

- Women who have never had a vaginal delivery
- Anxiety/ worry can lead to pain
- Use of numbing medicine

HEALTH CENTERS OFFERING THE FULL RANGE OF BIRTH CONTROL METHODS [8]

by state and county

UNITED STATES

19,246,170 women in need live in contraceptive deserts

1,150,420 women in need live in counties without access to a single health center that provides the full range of methods

2022

An Example:

Intrauterine Device (IUD)

What is it?

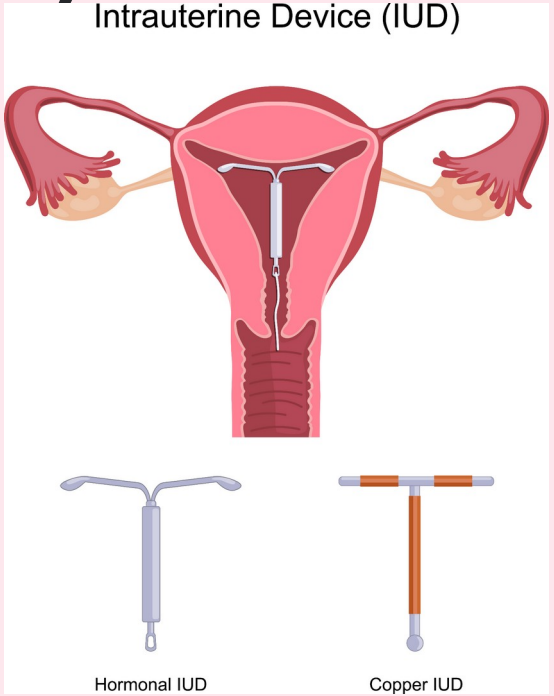

IUDs are small T-shaped devices make to be inserted into the uterus to prevent pregnancy.

Copper IUD:

Creates a cytotoxic environment, killing sperm before they reach the fallopian tubes,

Hormonal IUD:

Releases progestin, which causes thickening of the cervical muscles to block the passage of sperm cells.

Why IUD?

- No systemic side effects
- 99.9% success avoiding pregnancy
- Discomfort ends a few hours after insertion

Remaining Problems

- Most women find insertion “severely painful” [4]
- Pain management methods for gynecological procedures are not taught in OB/GYN rotations [12]
- Little education on how to detect malpositioning

Lack of awareness and training surrounding Long Acting Reversible Contraception **negatively impacts uptake and accessibility**, particularly in rural, low-income areas.

03 Solutions

Resources for continued learning and practice of insertion and counseling skills for different types of birth control.

1. The Control Kit

a. Includes reusable models for practicing insertion and removal
b. Educational pamphlets for patient and provider
c. Competency checklists

2. Online Resource

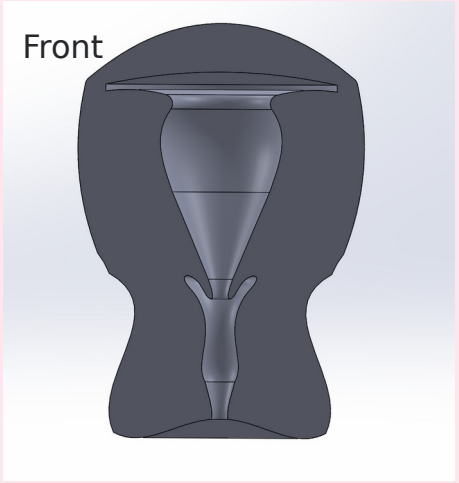

a. Scenario Practice consistent with updated eligibility guidelines
b. Addressing misconceptions

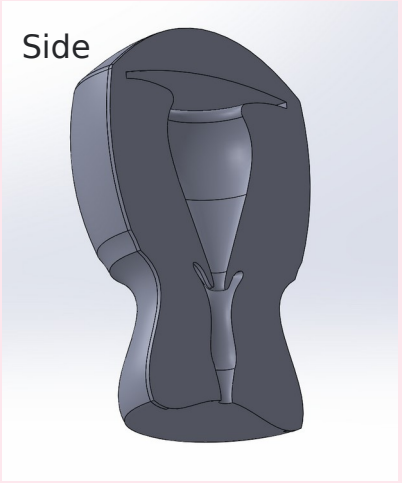

03 Solutions

Example of what training materials in the Control Kit would look like

The below would be used to practice IUD insertion. The uterine cavity would be lined with agarose hydrogel to show pressure points during inse

04 Marke

Customer

- Physicians
- Medical Schools
- Family Planning Clinics
- International Aid Organizations
- School Based Health Centers

Early

- Physicians in rural or low-income areas
- Medical Schools with a rural health focus
- School Health Centers in areas with high dropout rates due to pregnancy
- Primary Care Physicians

04 Market

- **School Based Health Centers (US, 2020)**
  - Addressing misconceptions and providing training for LARC counseling and insertion improved staff knowledge
  - Comfort in Liletta IUD insertion increased from 16% to 27% [9]
- **Primary Care (US, 2020)**
  - Provision increased 22.5% to 35% for IUDs and 31.5% to 49% for implants.
  - Same-day IUD insertion increased 26% to 35%
  - Knowledge of IUD eligibility rose from 69% to 84% [10]

Unique Value Proposition

Offering **continual** and **updated practice** inserting different types of birth control with **educational materials on each type**.

06 Potential Business Models

How?

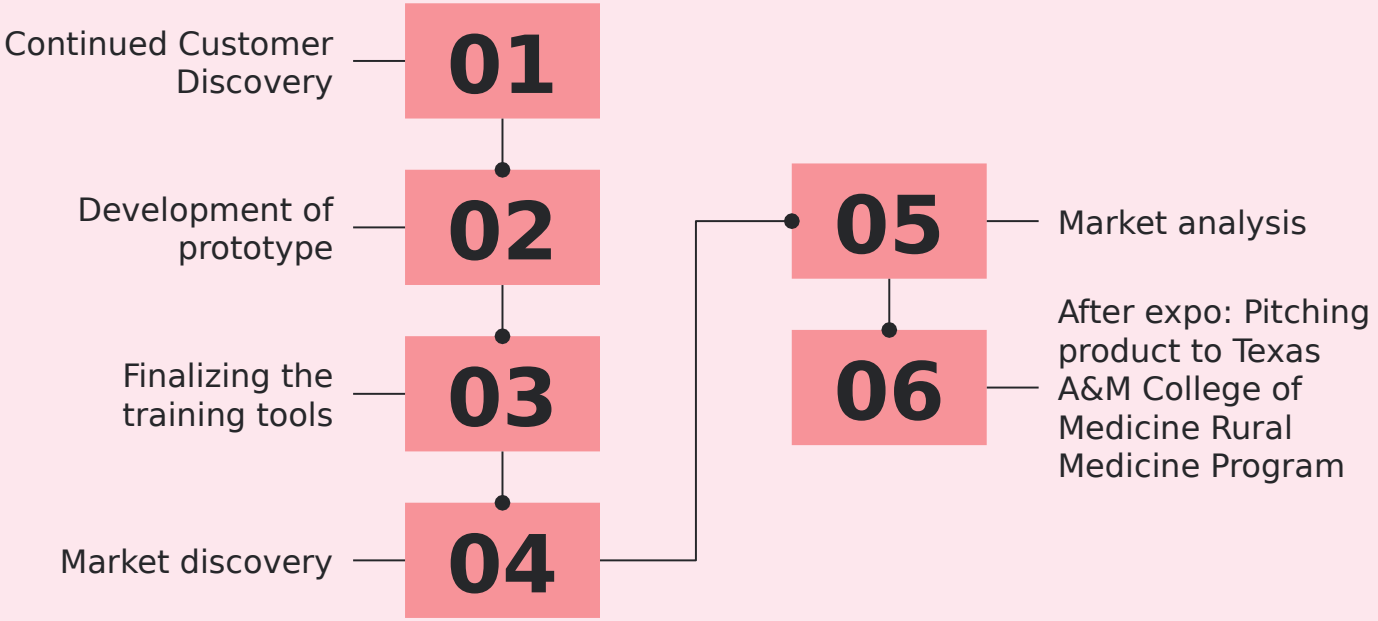

1. One-time purchase of training kits

Where?

2. Subscription to online resources
1. Focus first in urban centers
2. Move to rural/international

07 Plan

Continued Customer Discovery
01
Development of prototype
02
Finalizing the training tools
03
Market discovery
04
05
Market analysis
06
After expo: Pitching product to Texas A&M College of Medicine Rural Medicine Program
